I understand your reluctance – I share the sentiment. The problem is that if we need them I have to send someone to get them during business hours. If we have two we can use for backups I think we should be ok.

Subject: RE: Express Polls

I will still have two backups but one of them is the one that was taking a long time to create a card at the civic center this week that we took down. If we borrow some to use as backups, how soon could we get them because I am guessing we would have to do L&A on those too. I hate to say we will be fine with what we have and then have a problem.

Subject: RE: Express Polls

Yes we can do that – just make the changes to the paperwork to document what we did, why we did it, and what the new seal number is. The state has also offered to let us borrow some ExpressPolls if we need them. Do you think I need to take them up on their offer?

Subject: Express Polls

Hi Joseph, I have an Express Poll that I would like to use in place of the one that won't come on (it was not tested during L & A). Would it be possible to, unset for election, one of the Adairsville machines to test it on or do you have another suggestion?

Thanks

Subject: Repeat of the heading on the Advance Hearing Ballot

During L & A Testing, on occasion, the Advance hearing ballot would restart reading the heading when it would get to the county name of Bartow and say Bartow twice. I changed the cards used, the ballot style, the DRE machine, the Express Poll and the headset and none of these seemed to be the specific reason, it was just a random thing that happened and I could not pinpoint the source of the problem. This was not a problem during the reading of the races and candidates.

Thanks

Beth,

We think you might have a database error. CES will be calling you to make a change in your database. It looks like an export code that should be five characters long is only four.

Hi Melanie,

I am proofing the upload for the ENR page before publishing and it is not showing the Governor's Race.

Thanks

They're telling me that A4 and B3 are starting to slow down some. I'm not there to see it – just passing the information along.

I'm sitting down at the computers in AV right now and it's speeding along nicely. Both are server A1. I can touch base with our satellites in a bit too if needed.

Would you like us to keep you posted about any performance dips over the day?

Joseph and Cheryl,

We are approaching the time period when reports of slow response time started yesterday. Have you seen any slowdown in the system yet today? We are trying to gauge whether the changes we made last night had an impact, and any feedback would be appreciated.

Thanks,

John
